

ABSTRACT OF THE DISCLOSURE

A method of digitizing an image using a portable imaging system to produce an image product. The method comprises the steps of: a service provider transporting the portable imaging system from a first location to a second location; the service provider receiving the image to be digitized from a user at the second location; the service provider scanning the image at the second location using the portable imaging system to produce a digital image; the service provider receiving an order request associated with the digital image from the user; and the service provider providing the digital image to a fulfiller for fulfillment of the order request.
